Commitment to External Initiatives

The Enel Group's international role is also highlighted by its active participation in international associations and organizations that establish long-term goals and commitments to cope with the challenges of climate change and the social and economic pressures that concern the energy industry and the macroeconomic situation in general.

In addition, it is involved in major national and international industry associations and plays a proactive role in the main networks that develop corporate social responsibility projects and promote a way of doing business that is consistent with a sustainability-based perspective.

Global Sustainable Electricity Partnership

The Global Sustainable Electricity Partnership is a not-for-profit organisation whose members are the world's leading electricity companies. It promotes sustainable energy development through electricity sector projects and human capacity building activities in developing and emerging nations worldwide.

Observatoire Méditerranéen de l'Energie (OME)

The main purpose of the OME has been to **promote cooperation among the major energy companies** operating in the Mediterranean area. The association is both a research and information center on energy in the region and a think tank and a permanent forum among its members.

World Economic Forum, WEF

This organization, which engages international and political leaders, is aimed at shaping agendas on the main economic issues.

World Business Council for Sustainable Development, WBCSD

The WBCSD is an organization led by the CEOs of about 200 companies worldwide, connected with sustainable development.

EURELECTRIC

EURELECTRIC is the sector association that represents the interests of the electricity industry at pan- European level.

World Energy Council, WEC

WEC, one of the most important organizations in the energy field, includes companies from over 100 countries and its role as a consultant and mediator is recognised by the United Nations.
