

[learn more about Chevron's portfolio carbon intensity](#) 

climate policy

Chevron supports the Paris Agreement and is committed to helping to address climate change while continuing to deliver energy that supports society. Climate policy should achieve emissions reductions as efficiently and effectively as possible, at the least cost to economies.

actions and investments

Our approach to advancing a lower carbon future focuses on actions and investments in two core action areas: [lower the carbon intensity of our operations](#) and [grow lower carbon businesses](#). We expect our lower carbon capital to more than triple versus prior guidance to over \$10 billion between now and 2028 to progress our energy transition goals.

growing lower carbon business opportunities
